Senior Consulting Cardiologist,
Minneapolis Heart Institute®
at Abbott Northwestern Hospital

CONFERENCE OVERVIEW

This full-day conference will feature a fast-paced agenda with case presentations to illustrate clinical concerns, their evaluation and therapy options. Leading Allina cardiologists will emphasize practical approaches to common cardiovascular dilemmas encountered by the primary care physician, family physician and internist, including: How should I treat the resistant hyperlipidemic patient? What are the recommendations for treating progressively resistant hypertension? And what workup should be undertaken before non-cardiac surgery in the cardiac patient? Breakout sessions will feature hands-on learning and audience participation.

Learning Objectives

Upon completion of this conference, participants should be able to:

- Review the pathophysiology, diagnosis and treatment of systolic and diastolic heart failure.
- Assess the genesis, clinical implications, and therapy of atrial fibrillation and other common arrhythmias.
- Outline the proper utilization of advanced imaging techniques available for coronary artery disease and congestive heart failure.
- Evaluate patients for preoperative cardiac risk.
- Identify and diagnose critical limb ischemia, and evaluate treatment options.
- Discuss safety, efficacy, and appropriate use of newly approved anticoagulant and antiplatelet agents.
- Identify the basis for diagnosis and therapy of resistant hyperlipidemia and hypertension syndromes.

Afternoon Breakout Sessions

ECG and Arrhythmias

Dr. Bill Katsiyannis will present “bread and butter arrhythmias” and challenge attendees to identify them in a fast-paced, quiz-style breakout.

Pathology: The Jesse E. Edwards Registry of Cardiovascular Disease

Investigate cardiac anatomy and pathology by getting up close and personal with hearts from the Jesse E. Edwards Registry of Cardiovascular Disease. See and touch examples of hearts with diseases and conditions you see in your daily practice.

Advanced Cardiac Imaging

Join Dr. Rob Schwartz as he shares with you the latest and greatest in imaging technology. Review cases and learn how advanced CCTA can be used to provide detailed 3D images of the heart in seconds with minimal radiation.

Target Audience

Primary care providers, including internists, hospitalists, family physicians, nurse practitioners and physician assistants. Interested allied health professionals may also attend.

Accreditation

Allina Hospitals & Clinics is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.
